

## Bulk SMS Marketing with Custom Sender ID Spoofing

Supercharge your marketing with our next-generation Bulk SMS Campaign Service, engineered for high-performance outreach and brand impact. Our platform empowers you to send mass text messages globally, all while customizing the Sender ID (SID) — giving you full control over the name or number that appears as the sender.

### Key Features:

- Custom Sender ID (SID) Spoofing: Replace generic numbers with brand names, phone numbers, or campaign-specific aliases to increase open rates, trust, and engagement. Appear as a known entity — or strategically anonymous — depending on your campaign needs.
- Mass Messaging Engine: Instantly deliver thousands of SMS messages in bulk to your leads, customers, or target audience — powered by a fast and scalable backend designed for marketers.
- Precision Targeting: Segment your contacts by country, campaign, or lead type for tailored messages that convert.
- High Delivery Rates: Optimized routes and smart relay systems ensure your messages land where they're meant to — in inboxes, not blacklists.
- Automation & Scheduling: Plan your campaigns ahead of time with full scheduling features, randomized delivery windows, and drip-feeding for stealth.
- Dynamic Content Injection: Use variables to personalize each SMS for maximum response rates.

Whether you're running flash sales, political outreach, affiliate promotions, or viral campaigns — this system gives you the power to control your narrative, bypass restrictions, and scale fast.

---

### What We Need from You to Launch Your SMS Campaign

To ensure smooth delivery and maximum effectiveness of your SMS campaign, please provide the following:

## 1. Target List (Leads)

- Format: .CSV, .TXT, or .XLSX
- One valid phone number per line
- Include country codes (e.g., +1 for USA, +44 for UK)
- Optional: Separate columns for name, location, or tags if you want to personalize messages

## 2. SMS Message Content

- The exact message you want to send (160 characters max per message recommended)
- You can use placeholders like {name} or {city} if personalization is needed (we'll inject it dynamically)

## 3. Custom Sender ID (Optional)

- Text or numeric Sender ID (11 characters max for alphanumeric)
- If none is provided, a default will be used

## 4. Delivery Time Preference

- Instant blast or scheduled delivery
- Specify date, time, and timezone if scheduled

## 5. Campaign Name (Optional)

- For your reference and reporting

---

### Optional Features:

- Randomized Delivery Window: Spread your send-out over time to avoid detection
- Drip Campaigns: Send different messages to the same leads over several days
- Reply Handling Setup (if needed): Ask if you want to receive replies or redirect them

---
